¹For ILP sub-funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

Investment Strategy	
<ul style="list-style-type: none"> The Underlying Fund will invest primarily in equity and equity related securities (including listed preference shares, listed convertible unsecured loan stock, listed warrants and other similar securities) of issuers which have their registered office in Europe or exercise the predominant part of their economic activities in Europe (including UK) and which are considered by the Investment Manager to be undervalued or otherwise to offer good prospects for capital growth. The Investment Manager will adopt a primarily bottom up approach to selecting investments for the Underlying Fund and the Investment Manager will not be tied to investing in constituent companies of the Benchmark. Subject to the limits set out in section headed 'Investment Restrictions' in the full Prospectus, the Underlying Fund will have the ability: to hedge against directional risk using index futures and/or cash; to hold bonds and warrants on transferable securities; to use options and futures for hedging purposes and for efficient portfolio management; to enter into portfolio swaps; to use forward currency contracts; and to hold liquid assets on an ancillary basis. 	<p>Refer to Page 72 of the Underlying Fund's Prospectus for further information on the investment strategy of the Sub-Fund.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Management Company of the Underlying Fund is RBS (Luxembourg) S.A. The Investment Manager of the Underlying Fund is Jupiter Asset Management Limited The Underlying Investment Adviser of the Underlying Fund is Jupiter Asset Management Limited The Custodian of the Underlying Fund is JP Morgan Bank Luxembourg S.A. 	<p>Refer to Page 6 of the Underlying Fund's Prospectus for further information on these entities.</p>
KEY RISKS	
<p>The Underlying Fund is exposed to stock markets fluctuations and depends on the financial performance of the companies in which it invests its assets. There can be no guarantee that any appreciation in the value of the Underlying Fund's investments will occur and investors may not get back the full value of their investment. Set out below are further key risks.</p>	<p>Refer to Pages 27-33 of the Underlying Fund's Prospectus for further information on the risks of the Sub-Fund.</p>
Market and Credit Risks	
<p>You are exposed to general investment risks Factors affecting the value of securities in some markets and under certain situations cannot easily be determined and the value of such investments may decline or be reduced to zero.</p> <p>You are exposed to credit and counterparty risks The value of the Underlying Fund may be adversely affected if any of the institutions with whom the assets of the Fund are invested or deposited suffers insolvency or other financial difficulties.</p> <p>The Underlying Fund may invest in derivative financial instruments, comprising options, futures, index futures and currency forward contracts for hedging and efficient portfolio management. There is a risk that the use of such instruments will not achieve the goals aimed at. Also, the use of swaps, contracts for differences and other derivative contracts entered into by private agreements may create a counterparty risk for the Underlying Fund concerned.</p> <p>In the event of failure of the counterparty the Company may only rank as an unsecured creditor in respect of sums due from the issuer or broker in question, meaning that the Company may be unable to recover part or all of the assets exposed to that counterparty and any such recovery may be significantly delayed. Such delay or loss would be to the detriment of the Net Asset Value of Shares in the Underlying Fund.</p>	

Liquidity Risks	
<p>You are exposed to liquidity risk. In extreme market conditions there may be a lack of liquidity in the market which may adversely affect the ease of disposal of assets and the price at which the securities held by the Underlying Fund can be sold.</p> <p>The ILP Sub-Fund is not listed and you can redeem only on Business Days. There is no secondary market for the ILP Sub-Fund. All realisation requests should be submitted to Aviva Ltd.</p>	
Product-Specific Risks	
<p>You are exposed to risks related to investments in equities (including ordinary and preference shares) Share prices are influenced above all by the profits or otherwise of individual enterprises and sectors as well as macro-economic developments and political perspectives which determine the expectations of the securities markets and thus the movement of prices.</p> <p>You are exposed to risks related to investments in fixed-interest securities (including convertible debt securities) Fixed-interest securities could suffer when capital market interest rates rise, while they could increase in value when capital market interest rates fall. The price changes also depend on the term or residual time to maturity of the fixed-interest securities.</p> <p>You are exposed to risks related to investments in warrants In addition to the above risks involved with securities and exchange rate changes, warrants also carry the risk, but also the opportunity, of what is known as leverage. The opportunities and risks of warrants increase as the leverage increases. Since warrants are generally issued only for a limited term, it cannot be ruled out that they will be valueless at the date of maturity if the price of the underlying assets falls below the subscription price fixed when the call warrants were issued or exceeds the subscription price fixed when the put warrants were issued.</p> <p>You are exposed to risks related to investments in fixed-interest securities without regular interest payments and zero bonds Particular attention must be paid to observing the credit worthiness and assessing the issuer of interest-bearing securities without regular interest payments and zero bonds. In times of climbing capital market interest rates, it may be difficult to trade in such bonds, particularly because of their comparatively long term and the absence of continual interest payments.</p>

Sales and/or Surrender Charges may be applicable as described in the relevant Product Summary.
