<b>Investment Strategy</b>	
<p>The Underlying Fund invests nearly all of its assets in stocks. Normally, the Underlying Fund is divided equally among global growth and global value stocks. The Underlying Fund invests in equities from both developed and emerging-market countries; the Underlying Fund's investments in securities of issuers domiciled in emerging-market countries are not expected to exceed 30% of the Underlying Fund's net assets.</p> <p>Holdings are diversified across multiple styles, sectors and regions to maximize opportunities. The Underlying Fund may use hedging techniques that include the use of exchange-traded and "over the counter" (OTC) derivative instruments, including swaps, options, futures and currency transactions.</p> <p>The Underlying Fund may use derivatives for efficient portfolio management ("EPM"), and hedging purposes.</p>	Refer to "Investment Objective and Policies" in the Underlying Fund's Prospectus relating to the Underlying Fund for further information on the investment strategy.

<b>Liquidity Risks</b>	
<p><b>You are exposed to liquidity risks of underlying fund's investment.</b> Investments in illiquid assets or assets which become illiquid could prevent the Underlying Fund from promptly liquidating unfavourable positions and, therefore, result in losses to the Underlying Fund and corresponding decreases in the NAV of the Shares of the Underlying Fund.</p>

All realisation requests should be submitted to Aviva Ltd.</p> <p><b>You may not be able to redeem when a redemption limit is imposed or when redemption is suspended.</b> A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Underlying Fund outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances.</p>	
<b>Product-Specific Risks</b>	
<p><b>You are exposed to Derivatives Risks.</b> The Underlying Fund will use financial derivative instruments for investment purposes and for the purpose of meeting its investment objective. The Underlying Fund's investment in financial derivative instruments may involve additional risks, for example, counterparty default risk or insolvency risk, risk involved with effective management of derivative strategies, risk of mispricing or improper valuation of derivatives, risk of embedded leverage through investment in a derivative that is itself leveraged, risk of higher volatility, risk of illiquidity in the market for certain derivative strategies and risk of loss greater than the amount invested in the derivative, and may expose the fund to significant losses.</p> <p><b>You are exposed to Equity Securities Risk.</b> The value of underlying equity investments of the Underlying Fund may fluctuate in response to the activities and results of individual companies, or because of general market and economic conditions and changes in currency exchange rates.</p> <p><b>You are exposed to Turnover Risk.</b> The Underlying Fund is an actively managed investment fund - a higher rate of portfolio turnover increases brokerage and other expenses, which must be borne by the Underlying Fund and its investors.</p>
